

### **Willand School Sex Education Policy**

### **Introduction**

At Willand School, we are committed to promoting the physical, social, and psychological development of our pupils, ensuring they receive high-quality education that supports their well-being. A key aspect of this commitment is a well-structured Relationships and Sex Education (RSE) programme that equips children with the knowledge, skills, and confidence to navigate relationships and personal development responsibly.

What must primary schools teach in Relationships Education, Health Education and Sex Education?

#### **Statutory Requirements**

As of September 2020, Relationships and Health Education is now compulsory in all primary schools in England. For primary aged children this includes curriculum content under two headings as set out by the Department for Education (DfE, 2019):

Relationships Education	Health Education			
Families and people who care for me Mental wellbeing				
Caring Friendships Internet safety and harms				
Respectful Relationships Physical health and fitness				
Online Relationships	Healthy Eating			
Being safe Drugs, alcohol and tobacco				
Health and prevention				
Basic first aid				
Changing adolescent body				
Name external body parts Growth and development of humans from birth to old age Reproduction in some plants and animals				

As these subjects are statutory, parents/ carers **do not** have the right to withdraw their children from these lessons.

This DfE guidance clearly states the statutory requirements, i.e. what children MUST be taught by the end of primary school. Health Education includes learning about 'the changing adolescent body' to equip children to understand and cope with puberty. The National Curriculum for Science (also a compulsory subject), includes learning the correct names for the main external body parts, learning about the human body as it grows from birth to old age and reproduction in some plants and animals (which could include human beings). Therefore, Relationships Education, Health Education and Science are compulsory subjects and parents/carers do not have the right to withdraw their children from these subjects.

Sex Education however, is **not** compulsory although the DfE does strongly recommend 'that all primary schools should have a Sex Education programme tailored to the age and the physical and emotional maturity of the pupils.' In our school we define Sex Education as 'human reproduction' and the purpose of this policy is to share our school's position on teaching children about human reproduction and make clear which lessons parents/carers can request their child is withdrawn from.

# Additional proposed paragraph

We use the **Jigsaw** PSHE programme, which integrates Relationships and Health Education, emotional literacy, social skills, mindfulness, and spiritual development. The **'Changing Me'** unit, taught in the second half of the summer term, provides age-appropriate learning on puberty and human reproduction.

# What will my child actually be taught about puberty and human reproduction?

At Willand we use a teaching and learning programme called Jigsaw. The Jigsaw teaching materials integrate Personal, Social, Health and Economic Education (PSHE), emotional literacy, social skills, mindfulness, and spiritual development in a whole-school approach. The statutory requirements of the DfE Relationships and Health Education curriculum are woven throughout Jigsaw but are also specifically covered in the Relationships and Healthy Me Puzzles (units), with puberty and human reproduction being taught in the Changing Me Puzzle.

The 'Changing Me' unit is taught over a period of 6 weeks, in the second half of the summer term. It is all about coping positively with change. Each year group will be taught appropriate to their age and developmental stage, building on the previous years' learning. Please note: at no point will a child be taught something that is inappropriate; and if a question from a child arises and the teacher feels it would be inappropriate to answer, (for example, because of its mature or explicit nature), the child will be encouraged to ask his/her parents or carers at home. The question will not be answered to the child or class if it is outside the remit of that year group's programme.

All lessons are taught using correct terminology and with child-friendly language. All staff delivering sex education are Child Protection trained and follow the school's Child Protection Policy.

The grid below provides a summary of the Changing Me unit with respect to what is taught - when, relating to Puberty and Human Reproduction:

Puberty and Human Reproduction Overview			
Foundation Stage (Ages 4-5)	Growing Up	How we have changed since we were babies	
Year 1 (Ages 5-6)	My Changing Body	Understanding that growing and changing is natural and happens to everybody at different rates	
	Boys' and Girls' Bodies		

have changed since we were babies and where we are on the continuum from young to old. Feel proud about becoming more independent.  Boys' and girls'  Recognise the physical differences between boys and girls, using correct names for body parts and appreciate some parts of my Bodies body are private.  Year 3 (Ages 7-8)  How Babies Grow  How Babies Grow  Understanding that in animals and humans lots of changes happen when we are growing up and that usually it is the female who has the baby.  Babies  Understand how babies grow and develop in the mother's uterus and understand what a baby needs to live and grow.  Outside Body Changes  Understanding that boys' and girls' bodies need to change so that when they grow up their bodies can make babies. Identify how boys' and girls' bodies change on the outside during the growing up process Recognise how I feel about these changes happening to me and know how to cope with those feelings.  Year 4 (Ages 8-9)  Girls and Puberty  How a girl's body changes in order to be able to have babie and that menstruation (having periods) is a natural part of this. Learn strategies to cope with the physical and emotional changes	Vaca 2 (Accor C 7)	The Chamaina NA	December have and the dear

Year 5 Human Reproduction Lessons				
Inside Body Changes		How our bodies need to change so they can make babies when we grow up – inside changes and how we feel about them.		
Having a Baby	Th ne ex Ur		The parts of male and female bodies that are necessary for making a baby. Conception explained in simple biological terms. Understanding that having a baby is a personal choice.	
Conception		Understanding the place of sexual intercourse in a relationship and that sexual intercourse can lead to conception. Understand how babies are usually made and understand that sometimes people need IVF to help them have baby. Appreciate how amazing it is that human bodies can reproduce in these ways.		
Year 6 (Ages 10-11)	Puberty		Consolidating understanding of physical and emotional changes and how they affect us. Boy talk and girl talk single sex, with a chance to ask questions and reflect.  Becoming a teenager.	
Year 6 Human Reproduction Lesson				
Babies Conception to Birth		Understanding conception to the birth of a baby.		

As stated before, the puberty work fulfils the requirements of the 'Changing Adolescent Body' strand of statutory Health Education and parents cannot withdraw their children from this. However, the content in grey on the grid above in Years 5 and 6 we deem as 'Human Reproduction' and parents can request their children are withdrawn from all or part of these lessons.

We do believe though this work is an important part of safeguarding children, as knowledge empowers them, helping them to stay safe and cope with puberty understanding why their bodies will change. At secondary school, Sex Education is statutory and we believe that primary school should prepare children with accurate knowledge about puberty and human reproduction.

We will of course respect the beliefs of parents who wish to withdraw their child from all or some of the lessons for Years 5 and 6, which are highlighted in grey on the grid. We will engage in a positive dialogue with a view to illustrating to parents the relevance and importance of such a programme to their child so we encourage parents to talk to their child's class teacher in the first instance. Parents who still wish to exclude their child from lessons related to Human Reproduction will then be asked to do so in writing to the Headteacher.

# Parental Right to Withdraw from Sex Education

We respect the right of parents to withdraw their child from **specific lessons on human reproduction** in Years 5 and 6, as indicated above (highlight in grey on the grid).

- Puberty education is statutory and parents cannot withdraw their child from these lessons.
- Parents wishing to withdraw their child from Sex Education (human reproduction) must submit a written request to the Headteacher.
- We encourage parents to discuss any concerns with their child's class teacher before making a decision.

If parents/carers wish to proceed with withdrawal, a formal request must be submitted in writing to the Headteacher.

# **Rationale Strategy for Implementation**

We believe that knowledge empowers and protects children as long as it is age-appropriate.

- **Correct terminology** for body parts is introduced early to normalise biological vocabulary and to support safeguarding, ensuring children know these are private parts of their bodies.
- **Puberty is introduced gently in Year 3 and 4** because some girls may start their periods early and it is necessary to prepare them for this, so they aren't scared or worried.
- **Human reproduction** is introduced age-appropriately in Year 5 in the context of understanding why our bodies change during puberty.
- Year 6 provides further detail on conception and birth in a safe and respectful environment.

Puberty, conception and childbirth is age-appropriately covered in Year 6. In Year 6, there will be an opportunity for girls to talk to a female member of staff and boys to talk to a male member of staff during the course of this unit of work. Whenever possible health professionals, especially the school nurse, will work in partnership with the school and may come into school to discuss issues with the children.

\*\*\*

# **Menstrual Health Support**

Willand School recognises the importance of supporting pupils through puberty, including managing menstruation with dignity and confidence. We provide free period products in line with the DfE Period Product Scheme, ensuring accessibility for all pupils who need them. Staff are available to offer guidance and support, creating a safe and inclusive environment for open discussions about menstrual health.

### **Use of External Visitors**

'Use of visitors should be to enhance teaching by an appropriate member of the teaching staff, rather than as a replacement for teaching by those staff.' (Relationships Education, Relationships and Sex Education (RSE) and Health Education, DfE (2019) P18)

Visitors, such as health professionals, may be invited to support the RSE curriculum. However, they will complement—not replace—planned lessons, ensuring consistency and sensitivity.

## **Child Sexual Exploitation**

Children throughout the school are taught particular strategies to help them avoid Child Sexual Exploitation as they grow up. Children from Years 1-6 are taught about not keeping secrets, what a healthy and kind relationship is, understanding the idea of 'power' in relationships, understanding their self-worth, knowing they have the choice to say yes or no, understanding which parts of their body are private and what is appropriate and inappropriate touch. These objectives are covered in PSHE lessons and are not a specific part of the lessons on Human Reproduction in Years 5 and 6. However, teachers are aware of the issues surrounding Child Sexual Exploitation and will be sensitive around this subject. If, during any discussions, concerns arise about a child in a potentially vulnerable or dangerous situation, the teacher will consult the Designated Safeguarding Lead.

#### Inclusion and Sensitivity

We want every child to be safe, healthy and happy. This policy is written with the inclusion of all pupils in mind. Its content will be differentiated to accommodate all levels of ability. We aim to generate an atmosphere where questions and discussion on personal matters can take place without stigma or embarrassment. We will be respectful of the faith, beliefs and contexts of children's families.

We aim to provide an inclusive, safe, and respectful learning environment for all pupils:

- Content is **differentiated** to accommodate all abilities.
- Lessons are **non-judgemental** and allow for open discussion without stigma.
- We respect the **faith**, **beliefs**, **and cultural backgrounds** of all families.

# What about LGBT+ issues?

There has been much mis-information in the media about how LGBT+ issues are to be taught in within the Relationships, Health and Sex Education curriculum in primary schools. Jigsaw has produced a separate leaflet explaining it's approach to this, which is available to read on our school website.

#### **Safeguarding and Child Sexual Exploitation Awareness**

All staff are aware of safeguarding responsibilities:

- Children learn protective behaviours from Years 1-6, including recognising appropriate
  and inappropriate touch, understanding personal boundaries, and seeking help if
  needed.
- If concerns arise during RSE lessons, teachers will consult the **Designated Safeguarding** Lead (DSL).

# **Parental Partnership**

We believe Sex Education should be taught in partnership with parents. To support this:

- Parents are informed about **RSE content** before it is delivered.
- We provide opportunities for parental input and discussion.
- Parents are encouraged to continue conversations at home, reinforcing learning in a safe and familiar environment.

## **Conclusion**

Sexual development is a natural process, just one aspect of growing up emotionally, socially and physically. Each is an integral part of growing to adulthood and independence. The policy enables children to make comparisons with their own development and to reflect on their own relationships in positive ways. Ultimately the teaching and learning is about the promotion of self-esteem and the fostering of individual well-being.

# **Sex Education Guideline**

- 1. We believe that sex education and lessons relating to human reproduction should happen in partnership with parents. As with all other areas of our school, a positive effort will be made to inform and involve parents at all stages of the sex education scheme of work delivered in school. We also hope to provide advice to parents, where appropriate.
- 2. It is recognised that sex education is part of the more general areas of Personal, Social Health and Economic Education and Relationships and Health Education and that this area is considered important and valuable throughout the school.
- 3. It is also recognised that there are appropriate bodies of knowledge for an appropriate age or stage of readiness.
- 4. Sex education in our primary school will deal with sexuality in the broader context of the individual life and society. It will respect the family as a context for procreation growth and maturing.
- 5. We will respect the beliefs of parents who wish to withdraw their child from a sex education programme. Parents cannot, however, withdraw their children from aspects of sex education which are part of the National Curriculum.
- 6. We will attempt to convince parents of the relevance and importance of such a programme to their child.
- 7. Parents, who still wish to exclude their child from a sex education programme, will be asked to do so in writing to the Headteacher.
